To whom it may concern,

In July 2017 the Project SURFACE officially started.

Scope of the project is to provide to European Standards and to CIE TC4-50 reference and traceable data representative of current road pavements photometric performances and optimised and reliable geometrical conditions for the measurement of luminance coefficient (q) useful for smart and efficient road lighting.

In October 2017 SURFACE and TC4-50 organized the Second CIE *Workshop On Road Surface Characterisation* at the CIE Mid Term Session in Korea.

More than 30 experts attended the Workshop and the project was very well welcomed.

Now, I am pleased to invite you to the ***First SURFACE Stakeholder meeting***.

The meeting will be a satellite event at the [CIE Division 4 annual meeting](#) and [CIE Expert Workshop](#) "A new Vision of Visibility for Roadway Lighting".

The stakeholder meeting will be at the CIE Workshop, in **Berlin Friday, May 25** afternoon (from 14:00 to 17:00) at the [Technical University of Berlin](#).

The meeting is open to all audience and I invite you to sign as a stakeholder of the project. Being a stakeholder does not involve economic engagements, but gives the opportunity of being involved in the project.

The members of the SURFACE consortium will:

- present the project main objectives
- share the first results achieved
- announce the **First Measurement Intercomparison** on luminance coefficient q
- introduce the measurement facilities we are building up for European Road Lighting Community.

The intercomparison is open to all stakeholders with portable and laboratory measuring devices.

It will be a great time for sharing experiences and ideas on this topic!

A large time is reserved for discussion because we are interested to listen to your needs: being a stakeholder is a way to influence research and to be informed on the latest project news.

Please, follow the CIE web site for the event [CIE Road lighting visibility](#) and send me an [email](#) if you plan to attend.

The Consortium and me really hope to meet you in May in Berlin and have a very fruitful exchange of ideas.

Best regards

Paola Iacomussi
Coordinator of SURFACE

SURFACE puts together the expertise of National Metrological Institutes of Italy, Estonia, France, Finland, Sweden, and Switzerland, a French public Research Centre and unfunded companies of France and Switzerland.

Your company can join the stakeholder committee for free: you will be informed on the project results and achievements.
