

SURFACE

PAVEMENT SURFACE CHARACTERISATION
FOR SMART AND EFFICIENT ROAD
LIGHTING

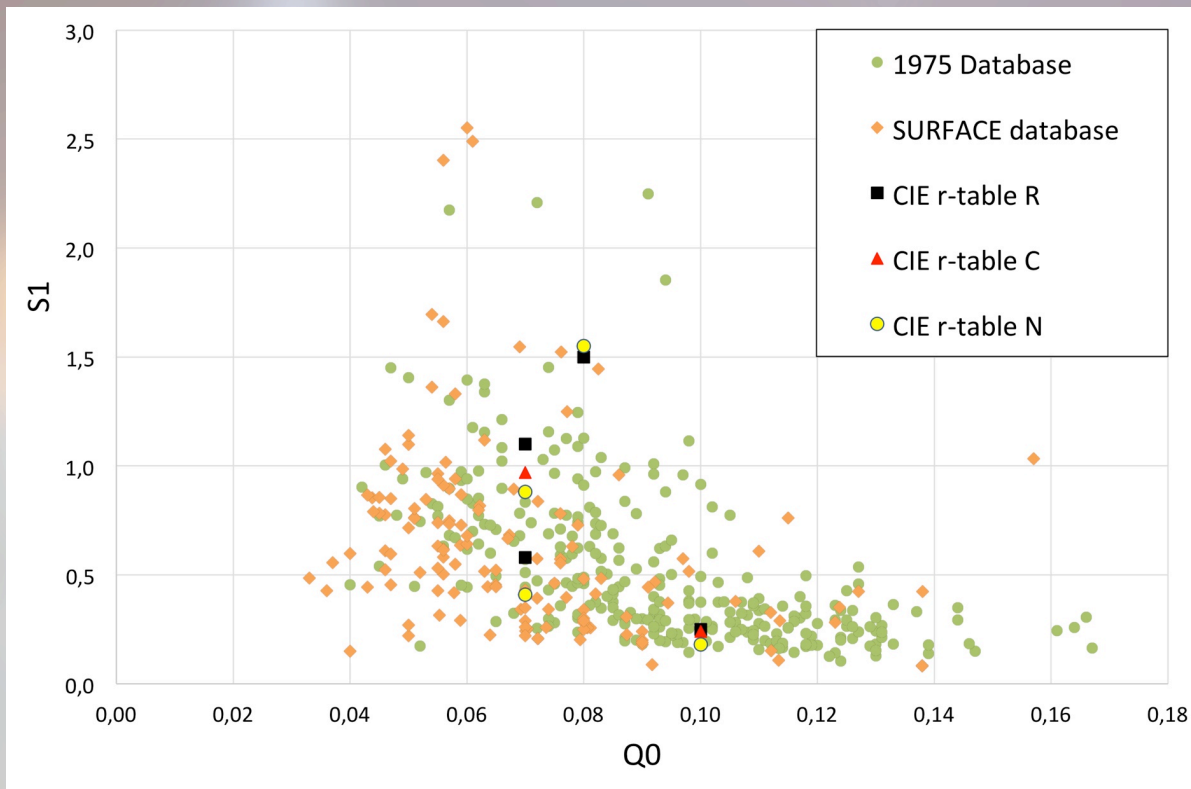

Geometries

- Based on environment:
 - **EXTRA URBAN:** 1° , far viewing distance, continuity with the past
 - **URBAN:** $2,29^\circ$ shorter viewing distance, enlarge measurement device availability
 - Additional one representative of boundary reflectance behaviour

Data base

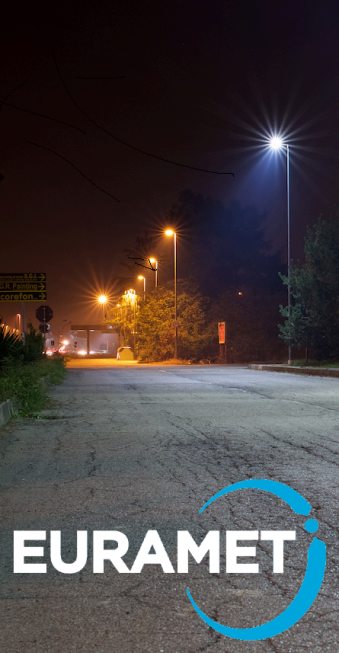

Data base impact

Intercomparison

More info

- Open meeting:
Today 3p.m.
Lincoln 3
- Presentations during TC4-50
Tomorrow
